About Me

AI & Data Science graduate with a strong interest in software development, artificial intelligence, and machine learning. Skilled in Python and web development, with a focus on learning new technologies and building practical solutions.

Technical Skills

- Programming:** Python, SQL, JavaScript
- AI & Data:** Machine Learning, Data Analysis, Computer Vision
- Web Development:** Django, HTML, CSS, REST APIs
- Tools:** Git/GitHub, VS Code, Google Antigravity
- Other:** Pine Script, YOLO, Power Bi

Certificates

- Infosys Foundation — Python Web Developer**
Python Web Developer — Infosys Foundation Finishing School for Employability, ICT Academy
Completed training in Python web development with Grade B, focusing on Python programming and web development fundamentals.
- Udemy — AI Algorithmic Trading: Buy/Sell Signal**
Completed an 11.5-hour course on algorithmic trading, exploring market data, buy/sell signals, and Python-based price prediction techniques including deep learning, Bayesian probability, and decision trees.
- Udemy — Complete Machine Learning & Data Science Bootcamp**
Completed a 44-hour bootcamp covering machine learning and data science concepts, techniques, and practical implementation.

Experience

Company: Proeffico Solutions Pvt. Ltd.
Duration: Jul 2023 – Aug 2023
Role: **Associate Engineer – Intern (Data Analytics)**
Analyzed customer data using Python libraries to identify patterns in credit history and segment customers based on relevant characteristics. Worked with a medical center dataset to derive meaningful patterns, perform data analysis, and support the development of data-driven solutions.

Projects

- TourCraze – Full-Stack Travel Planner & Group Expense Platform |** 05/2026-07/2026
Python, Django, JavaScript, SQLite, Bootstrap **Live Demo :** [Click to view Project](#)
 - Developed a full-stack travel platform with automated itinerary generation, destination discovery, hotel search, and travel community features.
 - Built TripSplit, a group expense management system using a greedy debt-simplification algorithm to reduce the number of settlement transactions.
 - Implemented responsive interfaces with JavaScript, AJAX/Fetch API, Django ORM, and REST APIs, including search, social feeds, interactive maps, and user authentication.
- TradeLab – AI Trading Platform & Automated Chart Pattern Detection |** 03/2025-05/2025
Python, Django, PyTorch, OpenCV, Gemini API, Pine Script **Live Demo:** [Click to view Project](#)
 - Developed a full-stack trading analysis platform using Django, integrating automated chart pattern detection and custom TradingView indicators.
 - Built a YOLOv5 computer vision model trained on 1,450+ annotated trading charts to detect 20 technical chart patterns.
 - Developed Pine Script indicators with EMA-based trend filters, candlestick pattern detection, and ATR-based stop-loss and take-profit calculations.
- Stock Market Analysis** 07/2024-08/2024
Analyzed datasets of various stocks, using Python libraries to visualize patterns in charts. Applied machine learning models to predict next - day buy/sell signals, enhancing stock market analysis and decision-making.

Education

Class /Course	School/College	Board	Passing Year	Score
B.Tech (AI and Data Science	Guru Tegh Bahadur Institute of Technology	AICTE	2025	9 CGPA
12th	S.S Mota Singh Model School	CBSE	2021	86.8%
10th	S.S Mota Singh Model School	CBSE	2019	87.5%
